

Protective Papers and Films

Protex 20V

PROTEX 20V is a 20 mil latex saturated tape which has an external vinyl coating increasing its abrasion resistance. It is used in the protection of acrylic windows, canopies, windshields and certain metal and painted surfaces requiring increased protection. A liner allows product to be die-cut if desired. **PROTEX 20V** has proven to be excellent in protecting graphite composite surfaces and tooling from impact damage that may result in possible interlayer fracturing.

**This product is not intended for fly-away applications. Test prior to use on copper, brass or anodized aluminum or before outdoor exposure.*

BACKING:

Basis wt., lbs./3,000 sq. ft.	175 - 187
Thickness, mils	19 - 23
Tensile strength, lbs./inch, M.D.	25 min.
Elongation, % M.D.	10 min.
Elmendorf Tear, grams, MD	280 min.
CD	360 min.

ADHESIVE:

Base	Natural Latex
Adhesion to steel, oz./in. width (At time of manufacture)	30 - 40 (-5/+7)
PSTC-1 (Modified)	Silicone Free

LINER: Flat

STORAGE: Shelf life is 1 year if stored in a cool dry place, out of direct sunlight.
